PERSONAL PROFILE

Software engineering student with experience delivering end-to-end web applications and solving real-world problems.

EDUCATION

Acropolis Institute of Technology and Research, Indore

2023 – Present

B.Tech - Information Technology - CGPA - 7.7

Indore, Madhya Pradesh

EXPERIENCE

Rasoi Rasta

March 2026 - Present

Role - Software Developer Intern

Remote

- Built user-friendly dashboards for managing menus, orders, reservations, and customer data.
- Integrated frontend interfaces with backend APIs to deliver seamless end-to-end functionality.
- Implemented new product features while maintaining existing modules and resolving production issues.

PROJECTS

AI Booth Management System 🔗 | [React](#), [JavaScript](#), [Spring Boot](#), [Database - Postgres](#)

2026

- Engineered a civic platform enabling voter registration, grievance tracking, and public issue management.
- Integrated AI-powered complaint prioritization with **Ollama**.
- Designed workflows for 3 user roles (Citizen, Officer, Admin).

Collaborative Productivity Platform 🔗 | [Next.js](#), [JavaScript](#), [Supabase](#), [Database - Postgres](#)

2026

- Developed a full-stack productivity platform enabling users to manage tasks, calendars, habits, journals, goals, and personal planning from a unified dashboard.
- Implemented secure authentication and role-based access to protect user data.
- Optimized application performance by reducing redundant database queries and improving navigation speed.
- Deployed the application and currently support 15+ active users, collecting feedback to guide iterative feature improvements.

AI-Powered News Verification System - 🔗 | [React](#), [Javascript](#), [Python](#), [FastAPI](#), [LLMs](#)

2026

- Engineered a scalable news credibility verification platform utilizing Large Language Models (LLMs).
- Implemented real-time data retrieval mechanics to ground model responses in external facts.
- Designed a responsive interface for submitting claims and reviewing verification history.
- Generated structured evidence-backed verdicts with confidence scoring and source attribution.

TECHNICAL SKILLS

Languages: Java, C/C++, JavaScript, SQL

Frameworks: React, Next.js, Node.js, Spring Boot

Developer Tools: VS Code, IntelliJ, Canva, GitHub, Docker, Linux

Core Concepts: Object Oriented Programming, Data Structures & Algorithms, DBMS, System Design, Distributed Systems

CERTIFICATIONS

- [Analysis and Design of Algorithms](#) 🔗 - NPTEL
- [Programming in Java](#) 🔗 - NPTEL
- [SQL](#) 🔗 - Hackerrank

EXTRACURRICULAR

- Selected for Delhi 2.0, a 3-day government innovation bootcamp, where I presented an AI Booth Management System to the Chief Minister of Delhi and senior officials.
- Actively contribute to open-source projects through feature development, bug fixes, and code reviews on GitHub.
- Received the Best Presentation Award at the Fibohack State-Level Hackathon. 2024
